PROFESSIONAL SUMMARY

Intelligent Systems student (4th Term – Fatec Pompéia) and Fullstack Development Intern at Rodojacto, working on the company's new platform (website and mobile app). Hands-on experience with Angular, Python, Java, microservices architecture, Docker and CI/CD, plus prior experience preparing data for AI models and working in a large industrial environment. Focused on clean architecture, software quality and delivering real-world systems.

TECHNICAL SKILLS

Languages: Python · Java · C · JavaScript · TypeScript · HTML · CSS
Front-end & mobile: Angular · Angular Material · Tailwind CSS · React · Ionic (learning)
Back-end: Flask · REST APIs · JWT and OAuth · RBAC · Microservices · Spring Boot, Kotlin and Go (learning)
Data: PostgreSQL · MySQL · MariaDB · Redis (Streams) · SQL · Alembic
DevOps & cloud: Git · GitHub Actions · Docker · Docker Compose · Portainer · Prometheus · Grafana · MinIO (S3) · Railway · Supabase · Linux (Ubuntu)
Tools: VS Code · IntelliJ IDEA · Android Studio · Postman · Insomnia · MySQL Workbench · SDKMAN

PROFESSIONAL EXPERIENCE

Fullstack Development Intern · Rodojacto Oct 2026 – Present
- Developing the company's new platform (website and mobile app) within the Quality, Processes and Technology department.
- Onboarding on the project stack (Angular, Ionic, Tailwind CSS, Java, Spring Boot, Kotlin and Go), with practice projects in Angular: a task manager (Angular Material and Tailwind CSS) and a supermarket system (Angular Material).

Apprentice – Asset Management and Control · Jacto Jan 2026 – Oct 2026
- Supported fixed-asset control for the entire Jacto group: creating asset numbers, assigning and shipping asset tags, write-offs and transfers.
- Managed the asset database and spreadsheets, ensuring data integrity, and answered process-related questions.

Participant – Inovaskill (AI Support) · Fatec Pompéia Mar 2025 – Nov 2025
- Cleaned and structured datasets used to train Artificial Intelligence models.
- Contributed to technology solutions for the institution's partner companies.

FEATURED PROJECTS

Movie Catalog (Tom Hanks) · Python/Flask · Angular · Docker · Redis · MariaDB · GitHub Actions
- Containerized microservices application (gateway, authentication, payments and audit), using Docker Compose and Portainer deployment.
- Authentication with password recovery and Google login, role-based access control (RBAC) and Stripe subscriptions with webhooks and Redis caching.
- CI/CD pipeline (pytest, images on GHCR, continuous deployment), observability with Prometheus and Grafana, auditing with Redis Streams, avatar storage on MinIO (S3) and OpenAPI/Swagger docs. Built for the Cloud Computing course (Fatec Pompéia).

Student Transportation Management System (Synapse Project) · Java · Angular · PostgreSQL · Docker
- Platform for the Pompéia City Hall with QR Code validation, seat reservation and real-time GPS tracking.
- Handled integration and bug fixing between the Java back end and the Angular front end. Project completed and presented; the city hall showed interest in deploying it.

Industrial and Logistics Control PWA (prototype) · React · Python · JavaScript · Railway · Supabase
- Interface for supervising industrial simulations (Industry 4.0), with working telemetry and chatbot, deployed on Railway with a Supabase database.

Weather Dashboard BR · Python · Streamlit · Data Visualization
- Interactive dashboards with real-time weather data for Brazil.

EDUCATION

Associate Degree in Intelligent Systems – Fatec Pompéia – Shunji Nishimura (4th Term) Feb 2025 – Present
Technical Course in Administrative Assistance – SENAI Pompéia (interrupted) Jan 2026 – Oct 2026
High School – Colégio Bezerra de Menezes Completed in 2024

LANGUAGES & CERTIFICATIONS

English – Intermediate (B1/B2), TOEIC certified · Portuguese – Native · Inovaskill Certificate – Fatec Pompéia (AI Support)
